

Galileo E-News #10

**Week 10's theme was:
"Futures Week"**

Goals:

This week students should have:

1. Developed a basic resume that highlights their transferable skills, experiences and personal qualities.
2. Developed some new note taking skills in anticipation of returning to mainstream.
3. Made significant progress on their final tasks for Galileo.

Trails & Classes

Within the framework of 'The Future', students participated in a broad range of activities.

Both major tasks were introduced to students—the Final Exhibition and Student Led Conference.

Their trails on Wednesday asked them to critically imagine how new technologies might impact on the world over the next 50-100 years.

A visiting graphic artist ran a visual note-taking workshop with students on Friday which was very well received by the students.

News & Updates

This week has been focused on supporting students to prepare for the future.

In an immediate sense—they have begun to prepare for the two final major tasks left to be presented this term—their Final Exhibition [with their team project] and their Student Led Conference [with family members and their homegroup teacher].

We have also been supporting them to start transitioning back to mainstream school, with a focus on study skills this week.

If you are yet to book in for the Student Led Conference [next Wednesday, 26 June] please go to Compass or be in touch with your child's homegroup teacher directly.

<< Here is a photo of students on the Robots vs. human trail..

Homework

Each week, all homework tasks will be posted on the Homework page of the Team Galileo wiki (link also below).

Students should be up –to-date with their work—this week they need to be actively preparing for next week's presentations.

All students are expected to comment on their blog partner's posts and respond to teacher comments.
